

Book Falconry Past and Present Tomáš Krivjanský

This fantastic book is not only covering history of falconry, but is a genuine chronicle documenting the international falconry community over past decade. I have never seen so many falconers in any book. Thanks incredible amount of colourful group photos from various falconry events, almost every internationally active falconer can find his photo inside.

The book involves all essential international events, such as UNESCO inscription in Nairobi in 2010, the international falconry festivals in 2007 and 2009 in the UK, the largest falconry festival in history in UAE in 2011, the festival in Qatar as well as falconry celebration in Europarliament in Strasbourg in 2011. I am really looking forward to continuation of this international chronicle.
